

## Bachelor Program in Digital Media and Technology

**Training professionals in the fields of social media, public relations and media technology:**

- English Taught Programs
- International Student Program
- Strong focus on practical and industrial training for the future

## Department of Foreign Languages and Literatures

**The department** is concerned to produce highly employable graduates. In order to achieve this aim, professional knowledge and language training are equally valued; and the curriculum design also includes vocationally oriented courses.

**The department** holds a great many research, cultural and leisure activities. There is an annual academic conference as well as a series of guest lectures. Other activities include graduation drama performances, and an 'English Week' which includes contests for short plays and debates. Western festivals such as Christmas are marked with a variety of lively events.

## Master Program in Sustainability and Disaster Management

- Leveraging the university's expertise and Tzu Chi Foundation's disaster relief experience
- Offering an interdisciplinary platform for exploring global challenges issues, sustainable development, and society resilience
- Addressing diverse themes in curriculum: zero carbon emissions, sustainable design, social solidarity economy, and disaster-related fields, etc.
- Providing internship opportunities within the Tzu Chi system

## Bachelor Program in International Service Industry Management

**International Service Industry Management nurtures future managers and leaders who embody the Tzu Chi spirit of sincerity, integrity, faith, and honesty.**

**Train students to be interdisciplinary professionals:**

Explore interests and hone expertise.

**Emphasize communication skills:**

Focus on secondary language proficiency, etiquette, and media information literacy.

**Prepare students for employment:**

Work with international service industry stakeholders.

**Bridge the gap between theory and practice:**

Twelve-month work placement gives students real-world experience and prepares them for their future careers.
